

The ITEC.CO Competition – Start up your business in ITEC

The topic of the competition is: ***“Nowadays, Using the computers for working, studying, relaxing at home or offices are becoming more popular, especially in the big cities. However, many of users do not know how the computer works when it goes wrong, both hardware and software. They usually ask for help from friends or take it back to the computer service company for repair. So the new IT service companies are appearing more and more in the market. As well as to improve the quality of service in the competitive environment, one of the important strategies in developing business, the companies will have also to find the new customers in the potential market. Let ITEC.Co know: Your ideas and strategic solutions to start up your business in IT service in the future”***
